

## **Product Description**

**Purina Mills® Preemie Pig Starter with LEANMetrics® Technology** is the first feed prestarter in the four-step starter complete program. Specifically formulated for the special needs of pigs weighing 7-11# postweaning. A 22% protein, 1.7% lysine nutrient- dense mini pellet product.

## **Product Outline**

- First product in the Purina Mills® Starter family.
- Fortified with NEW ingredients such Intake Intensifier (a proprietary feed additive) and proven direct-fed microbial to support immunocompetence.
- Fits perfectly with today's multi-site production methods.
- Achieves excellent early performance. Early growth advantages are maintained (or enhanced) to market weight.
- Features a food grade quality protein source of blended plasma proteins, peptides and peptones that is easily digested. Excellent amino acid profile for the young pig and enhances gut health.
- Includes fish meal, spray dried red blood cells and soy isolate for high quality, palatable, protein and maximum digestibility.
- Lysine level of 1.7% and additions of synthetic amino acids methionine, threonine and tryptophan for superior amino acid balance.
- Superior palatability through a unique flavor and high quality ingredients.
- High quality lactose sources to ease the transition to dry feed diets.
- Fresh processed oatmeal for energy and improved stool consistency.
- High levels of zinc from zinc oxide to enhance feed intake, improve growth rate and reduce scours.
- Combination of inorganic and organic acidifiers that create a more desirable gut environment.
- Pelleted in a mini 3/32" pellet specially for the small weanling pig.

**Purina Mills® Preemie Pig Starter-22HD**

- **Preemie** can be used as creep feed in farrowing.
- Backed by Purina's commitment to Research.
