

Product Description

Nature's Match™ Complete Prestarter Specifically designed for Natural Pork Production.

Nature's Match™ Complete Prestarter is a nutrient-dense complete diet containing a blend of highly digestible ingredients for pigs weighing 10-15 lb body weight.

Product Outline

- Nature's Match™ Complete Prestarter is the first pelleted prestarter for pigs from 10-15 lbs to minimize the negative nutrition balance that occurs the first few days post weaning.
- Designed for natural pork production: No antibiotics, synthetic growth promoters or animal by-products including plasma protein, blood products, meat meal and fishmeal.
- Nature's Match™ Complete Prestarter contains specific levels of lactose and whey to ease transition from sow's milk to less complex diets.
- Includes easily digested quality protein sources (soy protein isolate, spray dried select egg and whey) to enhance digestion and maximize growth.
- Contains yeast products and oatmeal to improve nutrient digestibility and enhance early feed intake.
- A small pellet size (3/32") designed to stimulate early intake.
- Sweetening and flavoring ingredients are added for palatability.
- Contains 100% of selenium as organic selenium to improve selenium absorption and selenium physiological utilization.
- Lysine level of 1.6% balanced with other essential amino acids in the correct ratios to meet the amino acid requirements for 10-15 lb pigs.
- Contains natural plant extracts, organic selenium, yeast extract, yucca shidigera extract and high levels of zinc to aid assistance of intestinal wellness and optimum gut health.
- Feeding period and feed budgets can be adjusted to pig weight, age and health status.
- Complements the following products,
 - Nature's Match™ Complete Starter 1.5 (1421000)
 - Nature's Match™ Starter Base (1421001)
 - LEANMetrics® EcoSelect Phytase (0053141)
 - LEANMetrics® EcoBase Phytase (0053140)
 - Surge™ Gel (0062717) – Unique innovative gel product

IMPORTANT: This product is to be fed only to the animal species as directed on this label. Follow these management practices:

1. Provide a source of fresh, clean water and adequate drinking space per pig at all times.
2. Provide a draft-free pen with clean, dry sleeping area.
3. When using a self-feeder, make sure it is adjusted to minimize feed wastage. Feeders should be well managed so as to provide adequate feeder space, prevent moisture condensation, mold and insect development.
4. Consult your veterinarian for recommended health programs in your area.
5. Any ration change should be made gradually. In order to reduce weaning stress, the pig's ration should not be changed within 5 to 7 days before or after weaning.

Caution: Store in a dry, well ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness or death.
